Analysts Discuss Marcellus, Other Emerging Shales, Plus Top Stock Picks in Webinar—Available Now at OilandGasInvestor.com.

Haynesville Webinar scheduled for January 28, 2009.

HOUSTON, TEXAS (December 18, 2008) – Calyon Securities (USA) Inc. analysts Mark Urness and Jeb Armstrong discuss U.S. shale plays and describe their top E&P and oilfield-service stock picks in “Opportunity Knocks: Evaluating Oil and Gas Stocks in the Current Market Environment,” a webinar presented by **OilandGasInvestor.com**.

The Marcellus continues to have strong potential, and development of the Haynesville play will affect gas markets and service-company stocks, according to Urness, managing director and head of energy research, based in New York.

It’s too early to get a handle on the economics of the Eagle Ford shale play, led by **Petrohawk Energy Corp.** (NYSE: HK) in South Texas, “but that is an exciting shale to watch,” says Armstrong, senior oil and gas E&P analyst also in New York.

The webinar archive and the analysts’ slides are now available at oilandgasinvestor.com along with an exclusive article on their presentation.

On January 28, 2009 at 10:00 AM CST OilandGasInvestor.com will present a webinar, “**Why the Haynesville Really is that Good**” addressing the following topics:

- The 2009 play outlook/overview
- Reservoir characteristics that make the Haynesville so prospective
- Capital flows and the natural gas price outlook in light of surging shale-gas supply

Register for this webinar at oilandgasinvestor.com/webinar/haynesville.
